SKILLS

Languages &

Framework: JavaScript (ES6+),
TypeScript, React, React Native,
HTML5, CSS3, Responsive Design,
Git

Design & UX: User Research,
Wireframing, Prototyping,
Information Architecture,
Accessibility, Interaction Design,
Design Systems

AI-Engineering Tools: AI-assisted
software development, Prompt
Engineering, Rapid prototyping, AI
workflow optimization, Human-in-
the-loop code review, Feature
planning, Documentation
generation

PROFESSIONAL SUMMARY

Front-End Software Engineer and UX Designer with experience designing, developing, and shipping responsive web and mobile applications from concept through deployment. Skilled in React, React Native, JavaScript, TypeScript, HTML, CSS, REST APIs, and modern front-end engineering. Passionate about building intuitive, scalable digital products that combine thoughtful UX with maintainable software architecture. Experienced using AI-assisted development workflows to accelerate planning, debugging, testing, and documentation while maintaining high standards for code quality.

TECHNICAL HIGHLIGHTS

- Designed and developed full-stack web and cross-platform mobile applications from concept through deployment.
- Combined UX design principles with front-end engineering to create intuitive, accessible user experiences.
- Used AI-assisted development workflows to accelerate planning, debugging, testing, and documentation while maintaining code quality.

FEATURED PROJECT

Magic: The Gathering Collection Manager

Cross-Platform Mobile Application

React Native · TypeScript · Expo · REST APIs · Jest

2025 - Present

Designed and developed a cross-platform mobile application that helps users scan, organize, and manage Magic: The Gathering collections while simplifying deck building and collection management through intelligent automation and user-centered design.

Key Contributions

- Built a cross-platform mobile application using React Native, TypeScript, and Expo.
- Designed the complete end-to-end user experience for collection management, OCR scanning, manual correction workflows, deck building, and AI-assisted features.
- Integrated the Scryfall REST API and designed client-side data handling to support intelligent search, caching, and real-time collection management.
- Developed OCR-powered recognition workflows featuring exact matching, intelligent fallback search logic, and manual correction to improve scan reliability.
- Architected modular service layers and reusable UI components to improve maintainability, scalability, and future feature development.
- Implemented caching strategies and optimized frontend data handling to improve recognition speed and application performance.
- Wrote automated Jest tests covering recognition services, caching logic, and application workflows.

EXPERIENCE

Frontend Web Developer (Contract)

Quantum Forge

2026

- Modernized a production business website by migrating externally hosted assets to local hosting, improving reliability and maintainability.
- Implemented responsive UI improvements while collaborating directly with the client throughout development.
- Delivered production-ready front-end updates using HTML, CSS, JavaScript, Git, and QA validation.

On My Way (OMW) - Project

Travel Planning Web App | React, JavaScript, Flask, PostgreSQL

2023 - 2024

- Developed a full-stack travel planning application using React, Flask, and PostgreSQL that enables users to create, organize, and manage trips.
- Developed reusable frontend components supporting trip planning, authentication, and itinerary management.
- Built responsive React components and interfaces using JavaScript, HTML, and CSS, with a focus on clarity, accessibility, and intuitive navigation
- Implemented authentication and validated user flows to ensure a smooth, error-free experience

UX Designer

Freelance

2021 - 2026

- Designed 20+ interactive prototypes in Figma, focusing on intuitive user flows and clear interaction patterns
- Conducted usability testing and translated insights into improved design decisions
- Created consistent visual systems to enhance usability and cohesion across interfaces

PROFESSIONAL DEVELOPMENT

- Actively developing and maintaining a production-scale React Native mobile application while expanding expertise in front-end architecture, testing, and performance optimization.
- Exploring AI-assisted software development workflows to improve planning, debugging, testing, and documentation.
